

# 17. Text decoration. Pseudo klasslar va qoidalarni guruhlash

Reja:

## ▼ Text decoration

**Text-decoration** - matnga qo'shimcha bezak qo'shish uchun ishlatiladi

Qiymatlari:

- **Underline** - mattni tagida chiziq hosil bo'ladi. Misol uchun: matn

```
<style>
  .heading-1 {
    text-decoration: underline;
  }
</style>

-----

<h1 class="heading-1">Tagiga chizilgan matn</h1>
```

- **Line-through** - mattni o'rtasida chiziq hosil bo'ladi. Misol uchun: ~~matn~~

```
<style>
  .heading-1 {
    text-decoration: line-through;
  }
</style>

-----

<h1 class="heading-1">O'rtasidan chiziq tortilgan matn</h1>
```

- **None** - matn hech qanday bezakka ega bo'lmaydi

```
<style>
  .link {
    text-decoration: none;
  }
</style>

-----

<a href="#" class="link">Tagidagi chiziqsiz ilova</a>
```

## ▼ Pseudo class

**Pseudo classes** - elementning holatlarini aniqlash uchun ishlatiladi.

## Umumiy ko'rinishi

```
selector-nomi:pseudo-class-nomi {
  css-xossasi: qiymati;
}

/* Misol uchun */
.heading-1:hover {
  background-color: blue;
  color: white;
}
```

## Holatlari:

- **Hover** - elementni ustiga sichqoncha olib kelingan holat

```
<style>
  .heading-1:hover {
    background-color: blue;
    color: white;
  }
</style>
```

```
-----  
<h1 class="heading-1">Ustiga sichqonchani olib keling</h1>
```

- **Active** - elementni ustiga sichqoncha bosib turilgan holat

```
<style>  
  .heading-1:active {  
    background-color: red;  
    color: white;  
  }  
</style>  
  
-----  
<h1 class="heading-1">Ustiga sichqonchani bosib turing</h1>
```

## ▼ Grouping rules

**Grouping rules** - bir necha selektorlarni guruhlab, ularga bir css qoidasini (xossa) ko'rsatib o'tish

```
<style>  
  .heading-1 {  
    background-color: red;  
    color: white;  
  }  
  
  .heading-2 {  
    background-color: red;  
    color: white;  
  }  
  
  .heading-1, .heading-2 {  
    background-color: red;  
    color: white;  
  }  
</style>  
  
-----  
<h1 class="heading-1">Qoidalarni guruhlash</h1>  
<h2 class="heading-2">Bu sarlavha ham tepadagi kabi css style ga ega bo'ladi</h2>
```
